

Qualifications & Memberships

- PhD in Nutrition, Faculty Medicine, Monash Uni 1992
- Post Grad Dip of Dietetics, Deakin University 1986
- Honours Nutrition program, Deakin University 1985
- Bachelor of Science, double major in Biochemistry and Microbiology, Melbourne University 1984
- Dip Botanic Med, Uni Newcastle 2010
- Member, Dietitians Association of Australia for >30yrs
- Member, Diabetes Australia, Victoria
- Member, Coeliac Society, Victoria
- Referee of scientific papers submitted to medical journals e.g *Asia Pacific Journal of Clinical Nutrition* *Journal of Nutrition and Dietetics*

Professional Profile

- Over 30 years experience as a clinical dietitian
- 2011 onwards Associate Professor, *Discipline of Dietetics & Human Nutrition, La Trobe University*, Research, Lecturing, Clinical & PhD supervisor
- 1988-2005 Nutrition scientist/researcher at Monash Uni for 20 yrs (mentored by medical clinical nutritionist Prof Mark Wahlqvist). Research on diabetic diet (Honours) and PhD/Post Doc on 800 elderly people from 5 countries to determine how the Mediterranean diet and lifestyle affects health/longevity. Skin health and medicinal use of herbs/spices/foods also studied. Nutrition Research Fellow and 'reader' of nutrition/herbal research, PhD supervisor.
- Lecturer in nutrition to medical students (Faculty of Medicine, Monash University) 1995-2001
- Managing editor, medical nutrition journal 2002-2006
- Published over 50 nutrition research papers
- Developed a data base on over 400 drugs and their interactions with foods, herbs and nutrients.
- Co-author 35 chapters to 7 university text books e.g "Food and Nutrition" editor Wahlqvist and "A Guide to evidence based integrative medicine" editor Dr Kotsirilos.
- Author of her 3 books "Food Sources of Nutrients" and "Medications: Good and Bad interactions with Foods, Herbs and Nutrients "You are what you Cook!"
- Coauthored 50 articles for Victorian gov. website BetterHealth Channel; 7 reports for Australian Gov
- Developed on-line nutrition courses for Monash medical students and doctors (Primed/ InTouch)
- Managing editor www.healthyeatingclub.org 2002-10

Consultations include:

Dr Kouris takes a holistic approach to patient care with the ultimate goal being improved wellness and optimal health. She goes beyond simple dietary coaching for the management of the presenting condition. She addresses all nutrition related symptoms that may involve multiple organs, nutritional insufficiencies caused by the condition/ diet/ medication/ environment. Treatment includes tailored dietary prescription and short term tailored evidence based nutritional therapy to aid in management of condition(s) and improvement of wellness.

Assessment of your Nutritional Status

- nutritional adequacy of your diet - using a combination of dietary history, clinical symptoms, nutritional biochemistry/blood tests; if your diet is lacking any nutrients, a combination of diet & short term supplements will be recommended to correct these
- medications - their effects on your nutritional status (e.g blocking absorption of nutrients)
- supplements - vitamins/herbs & interactions with medications

Medical Nutritional Therapy of:

Prescribed diet (and supplements if needed)
Adults and children aged over 10 years

- weight management/visceral fat "waist" loss (variety of diets utilised e.g intermittent fasting, Mediterranean diet, Cambridge diet)
- gastrointestinal disorders (reflux, gastritis, ulcers, gastroparesis, irritable bowel (FODMAP diet) crohns, colitis, coeliac, constipation/diarrhoea)
- insulin resistance, prediabetes, diabetes, polycystic ovaries
- high blood fats (cholesterol, triglycerides)
- fatty liver
- prehypertension/hypertension
- thyroid/fatigue/fibromyalgia
- gout, gall stones, kidney stones, kidney disease
- osteo/rheumatoid arthritis, osteoporosis
- cancer, immune function
- menstruation/PMT/fertility/migraines/mood
- hair, skin (acne/wrinkles/eczema/psoriasis), nails
- malnutrition (weight loss, cancer, eating disorders)
- nutrient deficiencies, vegetarians, anaemia

Vitamin Supplements

- Dr Kouris has a special interest in identifying nutritional insufficiencies as these can contribute to feelings of unwellness and development of health problems.
- Multivitamins are not commonly used. Instead, short term nutritional therapy may involve the use of specialised nutritional products that target specific organs (e.g bowel) or metabolic functions (e.g insulin action).
- Dr Kouris is opposed to mega doses of vitamins and will always use the lowest possible dose necessary for the shortest period of time.
- She is also opposed to long term supplementation and will educate patients on how to improve their diet to get the missing nutrients. Some patients may need long term supplementation if they are unable to improve their diet or if they have certain conditions or take certain medications.
- Patients at risk of nutritional insufficiencies include: chronic dieters/poor food intake; sedentary patients; patients on certain drugs; patients with chronic illnesses; pregnant/breastfeeding or women with young children; excess alcohol/smoking/drug abuse; vegetarians/ food sensitivities; some athletes; injured; elderly.
- Blood tests can detect deficiencies like iron, B12, folate, vit D & A, zinc, selenium, magnesium. Urine can be used to measure iodine levels. Some of these can be difficult/expensive to measure. Therefore Dr Kouris also looks for symptoms of insufficiencies (e.g tongue,nails, eyes, hair, skin, fatigue, brain fog, bowel issues, muscle pain, PMT etc).
- If there is a nutrient insufficiency, this is best corrected quickly with a supplement taken only for a few months as it may take too long to correct with diet alone.
- Dr Kouris also has a special interest in identifying deficiencies caused by medications and whether your vitamin/herbal supplements interact with your medications.
- She is also familiar with the best supplements on the market that are good quality and well absorbed.
- Supplements from the pharmacy or health food shop will be recommended. She may also recommend a practitioner only product which she has found to be clinically effective (she sells these at close to wholesale price to avoid conflict of interest).
- Dr Kouris also has a Diploma in Botanic medicine and has become familiar with the evidence behind some herbs i.e. interactions with drugs and their usefulness in helping conditions. She will liaise with the referring doctor about their use.

Fees (as of 30/11/2021)

Medicare EPC (all appointments 30 minutes)

If you have a chronic condition you may be able to see me under the Enhanced Primary Care Plan (EPC) program through Medicare. Your GP will decide if you are eligible. You may be allowed up to 5 visits to a dietitian. **Please note that bulk billing is not available.** The following charges apply if on EPC

- 1) **\$32 out of pocket** (\$58 paid by Medicare)
 - 1st **appointment** 30 min is **assessment only** (I may suggest more blood tests).
 - 2nd **appointment:** 30min for **diet plan and supplements** (if needed).
 - 3rd or **more appts:** 30min follow up progress (tweak diet plan and supplements)

Private Patients (rebates by most private health insurance companies)

- 1st **appointment 45-60 minute** (includes nutritional assessment, blood tests via your doctor, diet plan if time permits) **(\$150-\$180).**
- 2nd and 3rd **appointments 30min** (\$90) (progress, supplements if necessary)
- Long-term **follow-up 15min** (\$40)

Please call any time to make an appointment:

03 94837013 (leave message)
for **Murrumbeena or Aspendale**

By Appointment only
Weekdays and Saturdays available

We appreciate 48 hours notice in the case of cancellation or a fee (\$30) will be charged for broken appointments

My Books

For patients and health professionals

POCKET BOOKS/EBOOKS

- Food Sources of Nutrients \$12 (paperback)
- Medications: Good and Bad interactions with Food, Herbs and Nutrients \$15 (paper back)
- You are what you COOK! Recipe Book (suitable for diabetes, cholesterol, coeliac) \$25 (paper back)

Purchase from www.lulu.com

TEXT BOOKS

- Food & Nutrition (ed Wahlqvist ML), Allen and Unwin 2010 (contributed 9 chapters)
- Handbook of Integrative Medicine (ed Kotsirilos), Elsevier 2010 (2 chapters & 2 appendices on nutritional assessment and diagnosis, drug interactions, food sources of nutrients)

My Low carb Lupin Bikkies Skinnybik™ Hunger busting 5 star rating

Clinically trialled (diabetes friendly and may help with weight loss by reducing hunger)

- Low carb Orange & Poppyseed
- Low carb Date & Butterscotch
- Low carb Cocoa & Dark Choc Chip (gluten free)
- Low carb Cranberry & Coconut
- Low carb Lemon & White Choc Chip (gluten free)

Per serve (2 bikkies): only 100 calories, 2g sugar, 5g carbs, 5g protein, 5g fat, 5g fibre.

Wholefood ingredients

No artificial sweeteners, flavours, preservatives, colours

Purchase from my clinic Tues Thurs Sat or from www.skinnybik.com (free delivery)
